GSK

June 4, 2023

To whom this concerns,

I am delighted to apply to join GSK. After working for nearly five years at the National Physical Laboratory (NPL), I intend to take the next important step in my career. I am looking for the opportunity to take on more responsibilities in leadership and strategy in order to participate in a larger scale and longer term vision of the scientific developments. While doing so, I want to remain an active scientist participating in exciting, scientifically challenging projects and to be part of a dynamic, inclusive team where all members feel encouraged to give their best while being themselves.

- Exciting science
 - 4 main focuses HIV, Oncology, Infectious diseases, Immunology/respiratory
 - Innovation
 - bring science tech and talent together
- Culture
 - Flexibility
 - Inclusivity (inclusive, accessible new building, ...)
 - Net 0 by 2030
 - Encourage people to grow (learning/skill development, fellow schemes, ...)
- Quality
 - project onyx (data quality, FAIRness)
 - automation/templating
 - CI/CD
- Types of data
 - Multiomics (genomics, metabolo, lipido, proteo)

- Single cell
 - (cell) imaging
 - large scale clinical
- Methodology/techniques
 - Aftreglow: UQ4AI
 - GNisi: graph models (Ising)
 - LowDeepPredict: causal inference in genomics

Respectfully yours,

Xavier Loizeau
